## RESEARCH CORNER

- **Finding h-index**

  H-index is a quantitative indicator that measures the impact of a researcher's outputs. For example, an h-index of 10 indicates that 10 papers of the researcher have at least 10 citations each.

  To look up the h-index of a researcher, try these two Library databases: (1) Scopus or (2) Web of Science.

  ✱ **h-index on Scopus**

  In Scopus, look up an article by the author. Then click on the author's name.

[Top]

  Click "View h-Graph" to display an h-graph. Note that only articles published after 1995 are included in the calculation.
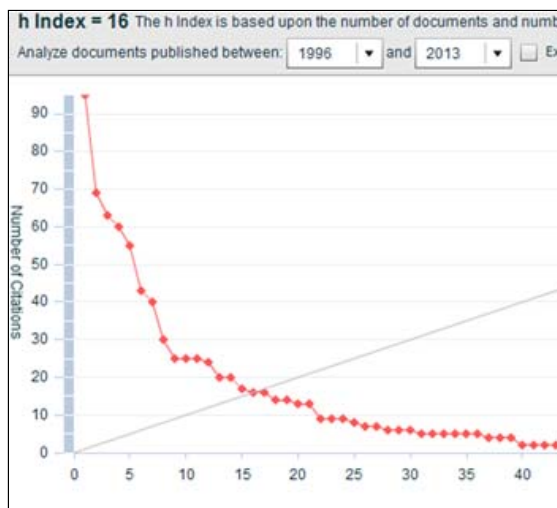

[Top]

✦ **h-index on Web of Science**

Locate any article by the author. Then click on the hyperlink next to his/name name.

Click "Create Citation Report"

[Top]

- **Searching for Past News Articles on WiseNews**

  WiseNews is a database which provides access to news articles from major newspapers, magazines and news sources published in Hong Kong, Macau, China and Taiwan from 1998 onwards.

  ✦ To search for news articles published in the past, click "**Wisers Information Portal**" at the top right corner.

  ✦ Click the **calendar icon** to select a date range

- **Finding International Standards**

  Looking for information about standards and standardization in databases subscribed by the Library? Try:

  ✦ **IHS Standards Expert**
  [Available within the Library or on campus only]

✳

IHS. The Source for Critical Information and Insight™

IHS Standards Expert provides access to the latest edition of the worldwide standards released by **AATCC, ANSI, ASHRAE, ASME, ASTM, BS, CIE, IEC, IPC, ISO, JIS, NFPA** and **UL**.

You may register to personalise your settings and to gain access to all features including:

- Easily access your **Favourite Documents**, and save notes.
- **Watch Lists** of documents to help manage standards that are critical to you.
- Set **Alerts** to inform you of changes and updates to important documents.
- Access **Recently Viewed Documents** from any page.
