• Let's Hear What They Say About Library Workshops

Feedback from a Postgraduate Student

I completed my undergraduate degree at PolyU many years ago and now I am studying a Master's degree in Knowledge Management. As I left school for quite a long period, I chose to update my knowledge by attending Library workshops. These workshops open my eyes on knowing that **abundant academic resources** are available at the Library. If I hadn't joined Library Workshops, I would have missed the opportunities of using all those **authoritative** and **valuable papers** for my research and study at PolyU.

Comment from an Undergraduate Student, a Frequent Workshop Attendee...

I joined Library Workshops on various topics: RefWorks, search engines, databases and Google Scholar. Some **in-depth features** are discussed and we did have some **practices** during the workshops. I believe these were **great opportunities** to learn mastering the techniques of using various tools. Joining library workshops also **enhanced my skills** in locating **useful resources** for my assignments.
