

Quick Guide to FUJIFILM MFP - Scan to PC

On FUJIFILM printer

① Press **Scan** on the Home screen of control panel.

② Press **MP-03**

③ Press **OK**

④ Select **Features** tab to change scanning features if needed. For example:

[File Format], [Resolution]

⑤ Press **Start** to begin scanning.

⑥ When scanning is finished, press **Complete Scan (Send)** to finish scanning.

⑦ The scanned files can be found in the "Scan_Result" folder on MP-03 Desktop

Remarks:

- All scanned files will be deleted after reboot. You are advised to copy your scanned files to external storage.
- To protect your personal data, please remember to reboot the notebook computer before leaving.
